

# Grounds and Maintenance Report for SBC (2019 - 2020)

The buildings and grounds have had many changes and upgrades this last year. As we all know it takes prayer, planning, effort and funds to maintain and upgrade this facility. I would like to thank all those that helped in this ongoing process. We are truly blessed to have this facility, in this location.

## Projects worked on this last year:

- The four older outside cabins repaired and painted
- The two new cabins were finished on the inside with flooring, painted, new bunk beds and trim
- New windows are there to be installed in the kelvington building
- Grounds were cleaned and trees trimmed in spring
- All electric heat was removed from main building and a natural gas boiler was installed
- The trailer was cleaned, painted, repaired and some new flooring was installed
- The main building had the bottom siding painted
- RO unit is getting any repairs done that are needed and the regular maintenance done
- Water samples sent in quarterly to provincial lab
- In January the Sask. Health Authority inspected the kitchen and accommodation parts of the facility, and both licenses were issued for the new year
- When the facility is in use a water test is done daily at the kitchen sink and in the dish washer as requested by the Sask. Health Authority
- Windows repaired in main building
- Eaves troughs cleaned out
- Vents in crawl space closed and insulated for winter
- Summer items all put away for winter
- Outside cabins were cleaned and in good shape for winter
- The whole building was cleaned including the kitchen and hood range after the boiler install

## Projects for this year:

- Windows and siding installed on the Kelvington building.
- Finish the exteriors of the two new cabins
- Build a fire wood shelter
- Install metal roofing on red storage shed.

Respectfully submitted: Mark Anderson
